

TABLE OF CONTENTS

Chapter 1 Introduction	1-1
Chapter 2 Capital Planning Framework	2-1
Chapter 3 Overview of NAS Modernization Investments	3-1
Chapter 4 CIP Program Descriptions	4-1
A01—En Route Automation Program	Automation-3
A02—Tower Automation Program	Automation-5
A03—Automated Radar Terminal System (ARTS) Improvements	Automation-6
A04—Standard Terminal Automation Replacement System (STARS)	Automation-8
A05—Air Traffic Management Program	Automation-9
A06—En Route Software Development	Automation-14
A07—Operational and Supportability Implementation System (OASIS) for	
Flight Service Automation System (FSAS)	Automation-15
A08—Operational Data Management System (ODMS)	Automation-16
A10—Oceanic Automation Program (OAP)	Automation-17
A13—Digital Bright Radar Indicator Tower Equipment (DBRITE)	Automation-18
A14—Instrument Approach Procedures Automation (IAPA)	Automation-19
A15—Civil Aviation Registry Modernization	Automation-20
A17—Aviation Safety Analysis System (ASAS)	Automation-21
A18—Safety Performance Analysis System (SPAS)	Automation-22
A19—Portable Performance Support System (PPSS)	Automation-23
A20—Integrated Flight Quality Assurance (IFQA)	Automation-24
A21—Conflict Probe	Automation-26
A22—Free Flight Phase 1 (FFP1) Integration	Automation-27
A23—NAS-Wide Information Services (NIS)	Automation-29
New Automation Mission Needs (2001–2004)	Automation-31
C01—Voice Switching and Control System (VSCS)	Communications-3
C04—Radio Control Equipment (RCE)	Communications-4
C05—Voice Switches	Communications-4
C06—Communications Facilities Enhancement	Communications-5
C09—Sustaining Backup Emergency Communications (BUEC)	Communications-6
C10—Emergency Transceiver Replacement	Communications-7
C11—Data Multiplexing Network (DMN) Continuation	Communications-8
C12—Expansion/Reconfiguration of Low-Density Radio Communications Link (LDRCL)	Communications-9
C14—Critical Telecommunications Support (CTS)	Communications-10
C15—FAA Telecommunications Satellite (FAATSAT)	Communications-11
C17—Establish Alaskan NAS Interfacility Communications System (ANICS)	
Satellite Network	Communications-12
C18—NAS Recovery Communication (RCOM)	Communications-13
C20—Aeronautical Data Link (ADL)	Communications-14
C21—Next-Generation Air/Ground Communications System (NEXCOM)	Communications-18
C22—Gulf of Mexico	Communications-19
C23—Voice Recorder Replacement Program (VRRP)	Communications-20
C24—FAA Skylinks	Communications-21
C25—Automated Flight Service Stations Voice Switches (AFSSVS)	Communications-22
C26—FAA Integrated Communications System for the 21st Century (FICS-21)	Communications-23
New Communication Mission Needs (2001–2004)	Communications-24
F01—Airport Traffic Control Tower/Terminal Radar Approach Control (ATCT/TRACon)	
Facility Establishment/Sustainment/Replacement	Facilities-3
F02—Large TRACON's	Facilities-4
F03—Austin–Bergstrom International Airport Program	Facilities-7
F04—DOD/FAA Air Traffic Control Facility Transfer/Modernization	Facilities-7

F05–Flight Service Station Modernization	Facilities-8
F06–Air Route Traffic Control Center (ARTCC) Plant Modernization/Expansion	Facilities-9
F08–Sustain San Juan Facilities	Facilities-11
F10–Airport Cable Loop Systems Sustained Support	Facilities-11
F11–Power Systems Sustained Support	Facilities-12
F12–Modernize and Improve FAA Buildings and Equipment Sustained Support	Facilities-14
F13–NAS Facilities Occupational Safety and Health (OSH) and Environmental Compliance	Facilities-15
F14–System Support Laboratory Sustained Support	Facilities-18
F15–General Support Laboratory Sustained Support	Facilities-19
F16–William J. Hughes Technical Center Building and Plant Support	Facilities-19
F17–Computer Aided Engineering Graphics (CAEG) Modernization	Facilities-20
F18–Aeronautical Center NAS Support Facilities	Facilities-22
F19–Aeronautical Center Leases	Facilities-23
F20–Provide FAA Housing	Facilities-24
F22–Child Care Centers	Facilities-25
F23–Relocate Honolulu Combined Center Radar Approach Control (CERAP)	Facilities-25
F24–Facility Security Risk Management (FSRM)	Facilities-26
New Facilities Mission Needs (2001–2004)	Facilities-27
M02–Technical Support Services	Mission Support-3
M03–Capital Investment Plan System Engineering	Mission Support-3
M04–National Airspace System In-Plant Contract Support Services	Mission Support-5
M05–NAS Regional/Center Logistics Support Services	Mission Support-6
M07–NAS Infrastructure Management System (NIMS)	Mission Support-7
M08–Continued General Support	Mission Support-8
M10–Distance Learning	Mission Support-13
M11–Aircraft Fleet Modernization	Mission Support-14
M12–Aircraft Related Equipment Program	Mission Support-15
M13–Precision Automated Tracking System (PATS)	Mission Support-18
M15–Spectrum Engineering Management	Mission Support-18
M17–Test Equipment Modernization and Replacement	Mission Support-20
M18–Computer Resources Nucleus (CORN)	Mission Support-20
M20–NAS Training Modernization	Mission Support-21
M21–Asset Supply Chain Management	Mission Support-22
M22–NAS Implementation Support	Mission Support-24
M24–National Aviation Safety Data Analysis Center (NASDAC)	Mission Support-25
M25–Independent Operational Test and Evaluation (IOT&E)	Mission Support-26
M26–NAS Management Automation Program (NASMAP)	Mission Support-27
M27–National Airspace Integrated Logistics Support (NAILS)	Mission Support-28
M28–FAA Corporate Systems Architecture	Mission Support-29
M29–Air Traffic Operational Management System (ATOMS) Local Area Network/Wide Area Network	Mission Support-32
M31–NAS Information Security System (NISS)	Mission Support-33
M33–Advanced Airport Security Systems	Mission Support-34
M-34–Airport Technology	Mission Support-36
M-35–General Aviation and Vertical Flight Technology	Mission Support-38
M36–Alaska Capstone Initiative/Safe Flight 21	Mission Support-39
M37–Cockpit Technology	Mission Support-40
New Mission Support Needs (2001–2004)	Mission Support-40
N03–Instrument Landing System (ILS)	Navigation & Landing-3
N04 –Visual Navaids	Navigation & Landing-5
N05–Low-Power TACAN Antennas	Navigation & Landing-6
N06–VORTAC	Navigation & Landing-7
N08–Runway Visual Range (RVR) Systems	Navigation & Landing-8

N09–Sustain Distance Measuring Equipment (DME)	Navigation & Landing-8
N10–Sustain Nondirectional Beacon (NDB)	Navigation & Landing-9
N11–Loran-C Monitors and Transmitter Enhancements	Navigation & Landing-9
N12–Augmentations for the Global Positioning System (GPS)	Navigation & Landing-10
N13–Transponder Landing System (TLS)	Navigation & Landing-13
New Navigation and Landing Mission Needs (2001–2004)	Navigation & Landing-14
S01–Airport Surface Detection Equipment (ASDE)	
Radar and Airport Movement Area Safety System (AMASS)	Surveillance-3
S02–Secondary Surveillance	Surveillance-4
S03–Terminal Radar (ASR) Program	Surveillance-5
S04–Long-Range Radar Program	Surveillance-7
S05–Long-Range Radar (LRR) Radome Replacement	Surveillance-8
S08–Precision Runway Monitor (PRM)	Surveillance-8
S09–Runway Incursion Reduction Program (RIRP)	Surveillance-9
S10–Automatic Dependent Surveillance Broadcast (ADS-B)	Surveillance-11
New Surveillance Mission Needs (2001–2004)	Surveillance-12
W01–Aviation Surface Weather Observation Network (ASWON)	Weather-3
W02–Weather Radar Program	Weather-4
W03–Terminal Doppler Weather Radar (TDWR) System	Weather-5
W04–Weather and Radar Processor (WARP)	Weather-6
W05–Low-Level Windshear Alert System (LLWAS)	Weather-7
W06–Digital Altimeter Setting Indicator (DASI) Replacement	Weather-8
W07–Integrated Terminal Weather System (ITWS)	Weather-9
W09–Airport Surveillance Radar Weather Systems Processor (ASR-WSP)	Weather-10
New Weather Mission Needs (2001–2004)	Weather-11

Appendix A
List of Acronyms and Abbreviations

Appendix B
New Program Number to Old Project Number Conversion

Appendix C
Old Project Number to New Program Number Conversion

Appendix D
Definitions

LIST OF FIGURES

Figure 2-1. FAA Organization	2-3
Figure 2-2. Selected NAS Assets	2-3
Figure 2-3. Capabilities and Architecture Tool Information.....	2-7
Figure 2-4. FAA Acquisition Management System, June 1997	2-8
Figure 2-5. Requirements Evolution Through Investment Analysis.....	2-10
Figure 2-6. NAS Architecture Role in the Acquisition Management System	2-12
Figure 3-1. NAS Architecture Development.....	3-2
Figure 3-2. NAS Modernization Phases.....	3-6

LIST OF TABLES

Table 2-1. Current and Future NAS Activity	2-15
Table 2-2. Average Age of Selected NAS Facilities/Systems	2-17
Table 3-1. Relationship of NAS Architecture/CIP to FAA Strategic Goals	3-7
Automation Functional Programs	Automation-1
Communications Functional Programs	Communications-1
Facilities Functional Programs	Facilities-1
Mission Support Functional Programs	Mission Support-1
Navigation and Landing Functional Programs	Navigation & Landing-1
Surveillance Functional Projects	Surveillance-1
Weather Functional Projects	Weather-1
